

ARIZONA WORKFORCE

EMPLOYMENT REPORT

Arizona Department of Commerce, Research Administration

January 22, 2009

Arizona Economy Weak in December; 12,400 Jobs Lost, Unemployment Rate Rises to 6.9%

Arizona's economy lost 12,400 non-farm jobs in December. Over-the-month, the loss was 0.5 percent, compared to the 10-year average over-the-month gain of 0.5 percent. Over-the-year, the loss was 4.3 percent. Goods-producing industries lost 6,700 jobs, while service-providing industries lost 5,700.

The seasonally adjusted unemployment rate for the state rose to 6.9 percent from 6.3 percent in November. Nationally, the rate was at 7.2

percent for December, up from 6.8 percent one month earlier.

Three nonfarm major industries — trade, transportation and utilities; financial activities; and educational and health services — had gains in December. The remaining eight major industries had losses — manufacturing; natural resources and mining; construction; information; professional and business services; leisure and hospitality; other services; and government.

Manufacturing lost 200 jobs. While nondurable goods had an increase of 100 jobs, durable goods lost 300 for a net loss for the overall industry. Within durable goods, fabricated metal was flat, computer and electronic parts decreased by 200 jobs and aerospace products and parts added 200.

Natural resources and mining shed 700 jobs — all in metal ore mining. Recent media reports indicate that this industry will continue to lose jobs.

Construction employment was down again for the 16th consecutive month (-3.3 percent over-the-month, or 5,800 jobs). This decline was well-below its 10-year average, over-the-month change of -0.2 percent. Declines were widespread among all component industries. Building

Arizona, U.S. Economic Indicators

Unemployment Rate (Seasonally Adj.)

	Dec. '08	Nov. '08	Dec. '07
United States	7.2%	6.8%	4.9%
Arizona	6.9%	6.3%	4.2%
Phoenix-Metro	6.3%	5.7%	4.0%
Tucson-Metro	6.5%	5.8%	4.4%
Flagstaff-Metro	6.0%	5.9%	4.3%
Lake Havasu City-Kingman-Metro	8.4%	8.3%	5.4%

Arizona Nonfarm Payroll Employment (in Thousands)

	Dec. '08	Nov. '08	Dec. '07
Overall	2,577.0	2,589.4	2,693.5
Over-Month % Chg.	-0.5%	-0.7%	0.0%
Year-to-Year % Chg.	-4.3%	-3.8%	-0.2%

construction (-1,800) and specialty trades (-3,600) were hardest hit, while heavy construction lost 400. Over-the-year, construction lost 20.7 percent of its employment; the 10-year average change is a 4.1 percent gain.

The trade, transportation and utilities

continued on page 2

Revisions to November 2008 Employment Estimates

Revisions to the November 2008 preliminary Current Employment Statistics (CES) estimates were unusually large in many states, including Arizona. The revisions reflect the routine incorporation of additional sample reports, and the use of new estimate review procedures provided by the Bureau of Labor Statistics (BLS).

The procedures are designed to improve the overall accuracy of total state estimates, bringing the aggregate employment change across states into closer alignment with the change in national employment, reflected in the estimates produced and published by BLS. The new review procedures more closely align the state review process with the BLS review process.

industry gained 1,600 jobs, due mainly to growth in the unreported transportation sector. Wholesale trade employment dropped by 400 and retail trade gained 500. The over-the-month gain in retail trade for December (0.2 percent) was well below the 10-year average (2.0 percent). Department stores had the largest gain within retail trade (+1,000). Motor vehicle and parts dealers (-300), furniture and home furnishings stores (-100), building materials and garden equipment dealers (-400), and food and beverage stores (-100) were all down in December.

Information had a loss of 200. Telecommunications remained unchanged.

About This Publication

Arizona Workforce is published 14 times a year by the Arizona Dept. of Commerce, Research Administration (RA) — 12 as the monthly Employment Report and twice a year as RA’s two-year Forecast Report.

Copies of the reports are available at RA’s Web site, www.workforce.az.gov, or by requesting a printed copy by calling 602-771-1100; writing to 1700 W. Washington, B32, Phoenix, AZ 85007; or sending an e-mail to: webmaster@workforce.az.gov

Material published in Arizona Workforce is in the public domain and can be reproduced without further permission. Appropriate citations are requested.

Frank Curtis	Director, Data Systems

Financial activities was up by 200 jobs overall or 0.1 percent in December. The 10-year average change for the month is 0.7 percent. The related sectors — credit and intermediation and related activities (-300); insurance carriers and related activities (-100) — had losses as securities, commodity contracts was flat. Real estate and rental and leasing gained 600 jobs over-the-month, while over-the-year the industry lost 2,900.

Professional and business services lost 4,100 jobs in December and for the past 12 months employment was down by 7 percent. The 10-year average over-the-year change was +3.8 percent. The over-the-month drop was due largely to a decrease in the administrative and support and waste sector; more specifically, the employment services subsector (-2,200). Services to buildings and dwellings also had a large impact on the overall industry with a loss of 1,200. Professional, scientific, and technical services lost 1,000 over-the-month; the over-the-year loss was 4,300.

The educational and health services sector was another major industry that gained jobs in December (+900). The over-the-month percentage increase was 0.3 percent, compared to the 10-year average of 0.6 percent. Health care and social assistance added 800 jobs, which came largely from ambulatory health care services (+100), hospitals (+200) and nursing and residential care facilities (+200). Nursing and residential care had a 0.5 percent over-the-month increase, faring slightly better than the 10-year average of 0.2 percent. While there were over-the-month gains in educational and health services (mainly health services),

over-the-month gains were less than in the prior year and are expected to decrease with recently announced layoffs.

Leisure and hospitality had a loss of 1,200 jobs. This was due to decreases in arts, entertainment and recreation (-600) and accommodation and food services (-600). In leisure and hospitality, over-the-month gains generally occur during December, yet this was not the case in December 2008. Accommodation was unchanged from November.

The other services industry was down by 300 jobs. This was well below the 10-year average of a 400-job gain.

Total government fell by 2,600 jobs in December, divided among seasonally-related education and non-educational losses. The establishment survey is conducted the week of the month which typically includes the school winter recess. State government was down by 1,000 jobs, and local government was down by 1,700. State government education was down by 400 jobs, while local education was down by 1,100. Federal government added 100.

Arizona’s economy continued to lose nonfarm jobs in December. While most major industries lost jobs in December, gains occurred in the major industries of trade, transportation and utilities (1,600); financial activities (200); and educational and health services (+900). Retail trade (-7.4 percent) dropped well below its 10-year average monthly increase. Local and state education lost a total of 1,500 jobs combined. The unemployment rate was up to 6.9 percent, still below the national average of 7.2 percent.

U.S. Jobless Rates Comparable Back to Late 1940s

Are the national unemployment estimates comparable to estimates from earlier years? Are the current state-wide unemployment estimates for Arizona comparable to the unemployment estimates which were published in previous years?

The national unemployment estimates produced by the Bureau of Labor Statistics are based directly on the Current Population Survey (CPS). Since the CPS program started in 1940, concepts and methods have been changed many times in order to improve the accuracy and usefulness of the survey while maintaining comparability with historical data. For example, in 1967, when the minimum age for inclusion in the survey was raised from 14- to 16-years old, historical data was revised to be consistent with the new definition. In 1994, the survey questionnaire was thoroughly revised. The technical details of the estimation process are subject to continual revisions.

For the nation as a whole, BLS maintains the current series of unemployment estimates back to 1948, so it is legitimate to compare current unemployment statistics to any of these earlier estimates. Some modified series are maintained back to 1940. Any estimates made prior to 1940 cannot be compared to current estimates without significant interpretation of the earlier numbers.

Arizona Workforce Q&A

Each month, Arizona Department of Commerce, Research Administration provides a brief description of terminology and topics discussed in the monthly Arizona Workforce Employment Report. An archive of these articles can be found on the Arizona Workforce Informer Web site: (www.workforce.az.gov).

The Department of Labor has been publishing unemployment statistics for the states since the end of World War II. Within the Department of Labor, BLS took over responsibility for estimating state unemployment in 1972 and began publication of state estimates in 1973. In 1976, after an expansion of the CPS sample, the BLS introduced the current program, under which all state estimates are benchmarked to annual average CPS estimates. Originally, unemployment estimates for some of the larger states

were made directly from the monthly CPS survey data, and direct estimation continued for some states until 1996.

The current state unemployment estimates, published by the Local Area Unemployment Statistics (LAUS) program, are calculated from a number of sources, including survey responses from the Current Population Survey (CPS), Census data, counts of continued claims for unemployment insurance, and total non-farm employment from the Current Employment Statistics program (the establishment survey). The methods used to estimate unemployment from these sources are now in the "third generation," or third major redesign.

Whenever there has been a significant change in the way state estimates are produced, BLS has made every effort to maintain comparability with estimates for previous years. As a result of these efforts, current unemployment estimates for Arizona are comparable to estimates made as far back as 1976. Any Arizona unemployment estimates for years prior to 1976 will not be directly comparable to current estimates.

Adjusted to the Current Population Survey (CPS 2008) to reflect place of residence. Benchmark year 2007, quarter 1.

* Seasonal adjustment not applicable for revenue sharing purposes.

Data is in thousands, rounded to the nearest 100. Annual averages may not add due to rounding.

Prepared in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics, by State of Arizona, Department of Commerce, Research Administration.

**ARIZONA DEPARTMENT
OF COMMERCE**

The center for economic advancement

— Equal Opportunity Employer/Program —

Under Titles VI and VII of the Civil Rights Act of 1964 (Title VI & VII), and the Americans with Disabilities Act of 1990 (ADA), Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975, the Department prohibits discrimination in admissions, programs, services, activities, or employment based on race, color, religion, sex, national origin, age, and disability. The Department must make a reasonable accommodation to allow a person with a disability to take part in a program, service or activity. For example, this means if necessary, the Department must provide sign language interpreters for people who are deaf, a wheelchair accessible location, or enlarged print materials. It also means that the Department will take any other reasonable action that allows you to take part in and understand a program or activity, including making reasonable changes to an activity. If you believe that you will not be able to understand or take part in a program or activity because of your disability, please let us know of your disability needs in advance if at all possible. To request this document in alternative format or for further information about this policy, contact the Department of Economic Security, Division of Developmental Disabilities ADA Coordinator at 602 542-6825 ; TTY/TDD Services: 7-1-1.
